## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments with respect to claims in the amendments filed 26 October 2007 have been considered but are moot in view of the new ground(s) of rejection.

The amendments have overcome the 103 rejection based on Kikuchi and Takahashi of the last office action .

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 15,17 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kikuchi et al (6,577,811) in view of Ando et al (6,389,222)..

Regarding claims 15, 17 and 27, Kikuchi discloses a recording system (Figs. 2, 63) for recording data on a recording medium(10X) comprising recording means (Figs. 8,9, 19 and 23) for record information including video object units (VOBUs) and VOB management information for managing ; title information for managing and controlling the reproduction of the VOBUs (Fig. 9); means for recording first identifying information (Fig. 23) , and means for recording second identifying information (archive flag(used for preventing erasing a corresponding title (Figs. 19 and 56) .

Kikuchi fails to clearly specify that the first identifying information further include information indicating that a VOB is logically erased state as being recited in claims 15 and 27.

Ando teaches an apparatus for recording information having VOB management information for managing VOBUs , the apparatus having a erasing means for generating identifying information that indicate a corresponding VOB is logically erased ( (temporarily erased ) for preventing errors in erasing or editing video objects (column 41, line 45 to column 42,line 48). It would have been obvious to one of ordinary skill in the art to modify Kikuchi with Ando by using a generating means as taught by Ando with the recording/ reproducing apparatus of Kikuchi for generating identification information as additional information of the first identifying

information to indicate that the first unit is logically erased state therefore preventing erroneously erasing recording information .

Regarding claims 17,33 and 34, Kikuchi as combined with Ando teaches that when a change of the first identifying information or second identifying information in response to the change of the first identifying information and second identifying information since Kikuchi teaches the first identifying information and second identifying information corresponds to each other ( See Kikuchi Figs. 17, 21 and 54-56, column 67, lines 5-10).

### ***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
